PROFESSIONAL SUMMARY

B.Tech Computer Science Engineering student (3rd year) with hands-on experience across data analysis, product design, and operations. Combines Python and SQL with data visualization (Power BI/Tableau), UX design, and end-to-end project documentation. Experienced in translating client requirements into technical specifications and working in cross-functional teams that delivered 100% on time. Currently building technical projects in zero-trust security, train ETA prediction, data pipelines, and REST APIs, alongside a full product and project management case study. 30+ shipped projects and 65+ certifications.

EXPERIENCE

Senior Lead Data Analyst, UpToSkills
Dec 2025 - Mar 2026

- Promoted from Data Analyst Intern to Team Lead to Senior Lead Data Analyst within 4 months, managing cross-functional teams across concurrent data projects and aligning technical execution with project roadmaps.
- Defined team OKRs, ran sprint reviews and enforced code-quality standards, achieving 100% on-time delivery across all project tracks.
- Standardized Python-based EDA and preprocessing pipelines, adopted across a 15+ intern cohort, reducing analyst onboarding time.

Lead Product Designer & UX Strategist, Andaman Dream Yatra
Apr 2025 - Sep 2025

- Ran client consultations and audience demographic research, using Power BI dashboards to analyze user behavior across age groups and validate design directions.
- Authored Product Requirement Documents (PRDs), wireframes, feature specifications and visual design architectures built for public accessibility.
- Directed the final UI/UX implementation through to client sign-off.

Operations Manager, Dweep Packers & Movers
Jul 2024 - Nov 2024

- Oversaw end-to-end operational workflows, resource coordination, account reconciliation and stakeholder communication to run internal processes efficiently.
- Authored standardized operating procedures (SOPs) and documentation for internal bookkeeping, streamlining administrative workflows and supporting executive decision-making.

Business Analyst, PSN Shipping Agency
Mar 2024 - Jun 2024

- Bridged technical teams and executive management through detailed data reporting, presentations and process documentation.
- Analyzed cargo and shipment datasets to pinpoint revenue leakage, translating raw metrics into clear strategic insights and actionable management briefs.

SELECTED PROJECTS

CarbonScope: Zero-Trust Industrial Emission Tracking (In Progress)

- Designing a zero-trust platform for India's industrial emission monitoring that signs raw sensor readings at the source (SHA-256, Ed25519) and cross-checks them against service-provider and CPCB portal records to detect tampering and silent data loss across 4,433 mandated industries.

  Tech Stack: Python, FastAPI, PostgreSQL (Supabase), TimescaleDB, PostGIS, Redis, Next.js, Deck.gl

RailSetu: Dynamic ETA Prediction for Coaching Trains, Smart India Hackathon 2026 (In Progress)

- Team lead of a 6-member team building an explainable train ETA system that gives a delay range and plain-language reasons, targeting 4.2 min average error versus a ~11.8 min NTES baseline; live prototype deployed.

  Tech Stack: Python, FastAPI, LightGBM, PostgreSQL + PostGIS, Redis, WebSocket, React

Interactive E-Commerce Sales & Customer Insights Dashboard (Planned)

- Building a Streamlit dashboard on a 10,000+ record sales dataset, using SQL window functions and aggregations to show monthly sales growth, top products by category and order value distribution.

  Tech Stack: Python (Pandas), Streamlit, Power BI, SQL

Automated Data Quality & Cleaning Pipeline Script (Planned)

- Building a reusable Python script that detects duplicates, handles missing values and flags anomalies in raw CSV files, outputting a cleaned CSV and an HTML summary report.

  Tech Stack: Python, Pandas, SQLAlchemy

Shipment Tracking REST API & Dashboard (Planned)

- Building a REST API and dashboard to create, update and track shipments, backed by a SQL database through SQLAlchemy.

  Tech Stack: Python, SQL, SQLAlchemy, REST APIs, Streamlit, Git

Travel Itinerary App: End-to-End Product & Delivery Plan (Planned)

- Planning a full product and delivery case study covering a PRD with user personas, Figma wireframes, North Star success metrics, a work breakdown structure, and a 3-sprint Agile roadmap with 15-20 cards.

  Tech Stack: Notion, Figma, Jira, GitHub Projects, Trello, Whimsical

EDUCATION

B.Tech, Computer Science Engineering, Dr. B.R. Ambedkar Institute of Technology, Sri Vijaya Puram
Nov 2024 - Present | GPA: 8.33/10

Senior Secondary (PCM + Computer Science), St. Mary's Senior Secondary School
May 2022 | 91%

TECHNICAL SKILLS

- **Languages & Core:** Python, Java, SQL
- **Data Analysis & Visualization:** Pandas, NumPy, Exploratory Data Analysis (EDA), Statistical Modeling, Power BI, Tableau, Matplotlib, Seaborn
- **Engineering & Development:** Git, REST APIs, Streamlit, SQLAlchemy, Workflow Automation, Code Quality Standards
- **Management & Operations:** Cross-Functional Leadership, Agile/Sprint Planning, OKR Execution, Stakeholder Management, Process Standardization
- **Documentation & Communication:** End-to-End Technical Documentation, Product Requirement Documents (PRDs), Client Requirement Translation, SOP Writing
- **Product & Project Management Tools:** Jira, GitHub Projects, Trello, Notion, Figma, Whimsical
- **Certifications (65+):** Google Advanced Data Analytics, Deloitte Data Analytics Simulation, Meta JavaScript Programming, Google Cybersecurity Professional, 2nd Place Data Science League (All India)
