

PAYAL MISHRA

Prothrapur, Sri Vijaya Puram | Ph: (+91) 7695075257 | Mail: payalmishra.tech@gmail.com |

Portfolio: <https://payalmishra.com/>

Linkedin: <https://www.linkedin.com/in/payal-mishra1894/>

Github: <https://github.com/payalmishra1809>

Profile

Motivated and detail-oriented BTech student with a strong foundation in design, coding, and communication. Passionate about developing innovative solutions, crafting intuitive user experiences, and translating complex ideas into functional and visually appealing designs. Adept at problem-solving, teamwork, and adapting to dynamic challenges in the tech industry. Eager to contribute technical expertise and creativity to impactful projects.

Experience

DATA ANALYST INTERN -UPTOSKILLS | DEC 2025-PRESENT

Data Analyst Intern at Uptoskills - Analyzed datasets using Python and SQL to derive actionable insights, supporting business decision-making in a fast-paced tech training environment.

TALLY ACCOUNTANT- DWEEP PACKERS MOVERS | MAY 2025 – OCT 2025

Handled the company's accounts, helped with the GST filing at Dweep Packers Movers, prothrapur, Sri Vijaya Puram for three months full time, and recently, part time and on weekends due to college timings.

WEB DEVELOPER - ANDAMAN DREAM YATRA | APRIL 2025 – SEP 2025

Built the website for Andaman dream yatra, a tours and travels agency in Dollygunj, Sri Vijaya Puram. Also have the maintenance charge for the same through remote mode.

Education

1. BACHELOR OF TECHNOLOGY IN COMPUTER SCIENCE ENGINEERING |
NOV 2024-PRESENT|

DR.BR.AMBEDKAR INSTITUTE OF TECHNOLOGY | SRI VIJAYA PURAM

2. INTERMEDIATE- PCM WITH COMPUTER SCIENCE | **JULY 2007- MAY 2022|**
ST. MARY'S SENIOR. SECONDARY SCHOOL | SRI VIJAYA PURAM

Projects

1. CHILD-VACCINATION-SYSTEM

Developed a production-ready Child Vaccination Management System compliant with India's National Immunization Schedule (NIS) 2025 for healthcare providers and parents.

2. FRAUD-DETECTION-SYSTEM

Developed a production-ready Credit Card Fraud Detection System achieving 98.21% AUC on Kaggle's 284K transaction dataset (0.17% fraud rate).

3. TIME SERIES SALES FORECASTING

Time-series analytics project on the Kaggle Store Sales dataset. The project focuses on transforming raw transactional data into daily and monthly sales, visualizing trends, and creating a baseline 6-month forecast to support inventory and planning decisions. Implemented fully in Python (Pandas + Matplotlib).

4. FACIAL ATTENDANCE SYSTEM

Developed a real-time Facial Recognition Attendance System using Python, TensorFlow Lite, and OpenCV for automated tracking via webcam input. This project logs attendance directly to CSV files, streamlining manual processes for educational or corporate settings while demonstrating computer vision and ML skills relevant to your image processing coursework.

5. BANK MARKETING PREDICTION

Developed a Random Forest predictive model to identify potential term deposit subscribers by applying label encoding and feature importance analysis. This project focused on identifying key customer behavior drivers and utilizing Scikit-Learn to solve real-world marketing challenges through data-driven insights and model optimization.

6. TITANIC SURVIVAL EXPLORATORY DATA

Conducted a comprehensive exploratory data analysis on the Titanic dataset to uncover demographic patterns influencing survival rates using Seaborn and Matplotlib. By implementing advanced data imputation for missing values, the project demonstrated expertise in data cleaning and statistical visualization to prepare datasets for machine learning.

7. US ACCIDENTS BIG DATA ANALYSIS

Analyzed a large-scale dataset of 7.7 million traffic records to pinpoint accident hotspots and peak risk times through sampling and geospatial modeling. This analysis leveraged Python to manage high-volume data and time-series trends, ultimately improving the ability to visualize severity across different states and timeframes.

8. WORLD POPULATION ANALYSIS

Utilized Python and Pandas to analyze World Bank population data spanning from 1960 to 2023, tracking global growth trends and regional shifts. The project involved implementing automated cleaning workflows and programmatic path management to create reproducible time-series visualizations that accurately represent demographic changes over six decades.

Certifications

1. **Java and Object-Oriented Programming** – Saylor Academy – Java
2. **Data Science Workshop** – AV Software Technologies – Microsoft Office, Tableau
3. **Data Analytics Job Simulation** – Deloitte – Data Visualization, Statistical Modeling, Data Analysis, Spreadsheets, Microsoft Office, Tableau
4. **Data Science Job Simulation** – Forage – Data Science, Data Visualization, Data Analysis, Microsoft Office, Tableau
5. **LinkedIn Content and Creative Design Certification** – LinkedIn – Content Design, Creativity
6. **Programming with JavaScript** – Meta – JavaScript
7. **Design Thinking – A Primer** – NPTEL – Design Thinking
8. **Digital Skills: Web Analytics** – Accenture – Analytical Skills
9. **Tally Prime and GST** – WISE Academy – Tally ERP, GST
10. **Introduction to Psychology** – Yale University – Psychological Assessment, Psychology
11. **Full Stack Development Bootcamp** – Udemy – Full-Stack Development
12. **Full Website Using WordPress** – Coursera – WordPress
13. **Increase Engagement on Instagram** – Coursera – Engagement Management
14. **Canva Editing** – Coursera – Canva
15. **Introduction to Cybersecurity** – Cisco – Cybersecurity, Cybercrime Investigation
16. **Microsoft Office Specialist: Excel Certification** – Coursera – Excel
17. **Google Ads Certifications** – Google – Advertising
18. **Google Advanced Data Analytics** – Google – Analytical Skills, Data Analysis
19. **Fundamentals of Digital Marketing** – Google – Digital Marketing, SEO, Advertising
20. **Investment Risk Management** – Coursera – Risk Management
21. **Assets, Threats, and Vulnerabilities** – Google – Cyber Threat Intelligence, Asset Management, Vulnerability Management
22. **Advanced Data Analytics Capstone** – Google – Data Analysis
23. **Automating Cybersecurity Tasks with Python** – Google – Automation, Python
24. **Build a Website with WordPress** – Coursera – WordPress
25. **Building Dynamic UI for Websites** – Google – Website Building
26. **Building Wireframes and Low-Fidelity Prototypes** – Google – UX Design
27. **Business Analysis and Process Management** – Coursera – Business Analysis
28. **Chatbot Using AI** – Coursera – Chatbot Development, Testing

29. **Creating High-Fidelity Designs and Prototypes in Figma** – Google – Figma, High-Fidelity Design
30. **Cybersecurity Job Preparation** – Google – Cybersecurity
31. **Designing UX for Social Good** – Google – Social Services, UX Design
32. **Detection and Response** – Google – Responsiveness, Fraud Detection
33. **Foundations of Cybersecurity** – Google – Cybersecurity, Cybercrime Investigation
34. **Foundations of UX Design** – Google – UX Design
35. **Foundations of Data Science** – Google – Data Science, Data Management
36. **Getting Started with Python** – Google – Python, Pandas
37. **Google AI Essentials** – Google – Artificial Intelligence
38. **Google Generative AI Course** – Google – Artificial Intelligence
39. **Google UX Design** – Google – UX, UX Research
40. **Google Cybersecurity** – Google – Cybersecurity, CTI, Cybercrime Investigation
41. **Linux and SQL** – Google – Linux, Red Hat Linux, SQL
42. **Manage Security Risks** – Google – Cybercrime Investigation
43. **Network and Network Security** – Google – Network Security
44. **Nuts and Bolts of Machine Learning** – Google – Machine Learning
45. **Regression Analysis** – Google – Regression Analysis
46. **Search Engine Optimization with Squarespace** – Coursera – SEO, E-commerce SEO
47. **Start the UX Design Process** – Google – UX Design
48. **The Power of Statistics** – Google – Statistical Modeling, Data Analysis
49. **Translating Data into Insights** – Google – Machine Translation
50. **UX Research and Testing Concepts** – Google – UI Design, UX Research

Skills & Abilities

Programming & Development

1. Java, JavaScript, Python (including Pandas), C/C++ (procedural/OOP paradigms)
2. Full-Stack Development, WordPress, Linux, Red Hat Linux, SQL
3. Automation, Chatbot Development & Testing

Data Science & Analytics

1. Data Science, Data Analysis, Data Visualization, Statistical Modeling

2. Advanced Data Analytics, Regression Analysis, Machine Learning (Nuts & Bolts)
3. Tableau, Spreadsheets, Microsoft Office (Excel Specialist), Data Management

Cybersecurity

1. Cybersecurity Fundamentals, Cybercrime Investigation, Cyber Threat Intelligence (CTI)
2. Network Security, Vulnerability Management, Asset Management
3. Automating Cybersecurity Tasks, Security Risk Management, Detection & Response

Design & UX/UI

1. User Experience (UX) Design (Google UX Professional), UX Research
2. Figma (High Fidelity Designs & Prototypes), Wireframes & Low-Fidelity Prototypes
3. Canva, Design Thinking, Content & Creative Design

Digital Marketing & Business

1. Digital Marketing, Search Engine Optimization (SEO), Google Ads
2. Engagement Management (Instagram), Web Analytics, Business Analysis
3. Risk Management, Tally ERP, Goods & Services Tax (GST)

Additional Skills

1. Artificial Intelligence (AI) & Generative AI (Google AI Essentials)
2. Psychological Assessment, Psychology

Activities and Interests

1. **Reading** diverse genres to expand knowledge and perspectives.
2. **Researching emerging technologies** and academic topics.
3. Creating **art** through digital design and creative expression.
4. **Travelling** to explore new cultures and destinations.
5. Writing **poems** to channel creativity and emotions.
