PROFESSIONAL SUMMARY

B.Tech Computer Science Engineering student and Senior Lead Data Analyst who bridges deep technical execution and management expertise, progressing from Data Analyst Intern to Senior Lead Data Analyst in 4 months. Combines robust coding capabilities in Python and SQL with strong UX design, data visualization (Power BI/Tableau), and comprehensive end-to-end project documentation. Proven track record of translating complex client requirements into technical specifications, architecting data workflows, and leading cross-functional teams to 100% on-time delivery. Equally equipped for technical software/data roles and strategic management positions, backed by 30+ shipped projects and 65+ certifications.

EXPERIENCE

Machine Learning & AI Intern | Skill Nexis Aug 2026 - Present

- Selected for an online internship in the Machine Learning & AI domain, delivering assigned real-world projects against defined deadlines to build applied ML experience.
- Applied core machine learning workflows to structured project tasks, strengthening model development and applied problem-solving skills alongside a peer intern cohort.

Artificial Intelligence Intern | Codec Technologies Aug 2026 - Present

- Working as a Project Intern on a global hybrid platform, executing assigned AI projects and structured training tasks under a dedicated project head.
- Gaining industry-level exposure to applied AI workflows within a consultancy operating across 27+ countries, with performance tracked via weekly project reviews.

Senior Lead Data Analyst (promoted from Data Analyst Intern → Team Lead) | UpToSkills Dec 2025 - Mar 2026

- Progressed rapidly through leadership ranks within 4 months, managing cross-functional teams across concurrent ML projects and aligning technical execution with project roadmaps.
- Headed department operations as senior lead: defined team OKRs, ran sprint reviews, and enforced code-quality standards, achieving 100% on-time delivery across all project tracks.
- Standardized Python-based EDA and preprocessing pipelines, adopted across a 15+ intern cohort, dramatically reducing analyst onboarding time and operational friction.

Lead Product Designer & UX Strategist | Andaman Dream Yatra Apr 2025 - Sep 2025

- Conducted in-depth client consultations and audience demographic research, utilizing Power BI dashboards to analyze user behavior across age groups and validate design directions.
- Authored end-to-end Product Requirement Documents (PRDs), wireframes, feature specifications, and visual design architectures tailored for public user accessibility.
- Leveraged AI-assisted development tools to prototype the platform, manually refining, structuring, and directing the final UI/UX implementation to ensure seamless human-led design control and client sign-off.

Operations Manager | Dweep Packers & Movers Jul 2024 - Nov 2024

- Oversaw end-to-end operational workflows, resource coordination, account reconciliation, and stakeholder communication to optimize internal processes for peak efficiency.
- Authored standardized operating procedures (SOPs) and comprehensive documentation for internal bookkeeping, streamlining administrative workflows and executive decision-making.

Business Analyst | PSN Shipping Agency Mar 2024 - Jun 2024

- Facilitated cross-departmental alignment by bridging technical teams and executive management through detailed data reporting, presentations, and process documentation.
- Analyzed cargo and shipment datasets to pinpoint revenue leakage, translating raw metrics into clear strategic insights and actionable management briefs.

SELECTED PROJECTS

Enterprise Supply Chain Revenue Leakage & Profitability Dashboard (Data Analysis & Power BI)

- Analyzed 100K+ shipping and financial records using Python (Pandas, NumPy) to identify operational bottlenecks and revenue leakage, designing an interactive Power BI dashboard with drill-down metrics for executive decision-making.

  Tech Stack: Python, Pandas, NumPy, Power BI, SQL, End-to-End Business Analysis

Client-to-Engineering Requirement Translation & Pipeline (Technical Workflow & Documentation)

- Acted as the communication bridge between external stakeholders and internal dev teams, ingesting client feedback, drafting comprehensive technical specification documents, and turning them into structured Python/SQL backend workflows and Jira tickets.

  Tech Stack: Python, SQL, Git, Markdown Documentation, Confluence/Jira Workflow

Automated Python Data Profiling & Reporting Utility (Python Scripting & Automation)

- Developed a standalone Python automation tool that ingests raw enterprise datasets, executes automated exploratory data analysis (EDA), generates statistical distribution visualizations, and compiles complete technical data dictionaries.

  Tech Stack: Python, Pandas, Matplotlib, Seaborn, Automated Reporting Engine

Cross-Functional Agile Sprint & Task Tracking System (Full-Stack Data Application)

- Engineered a full-stack internal tracking application with a Python/Streamlit backend and interactive frontend dashboards to manage multi-team deliverables, track sprint burn-down metrics, and maintain real-time project documentation.

  Tech Stack: Python, Streamlit, Git, REST APIs, Documentation Framework

EDUCATION

B.Tech, Computer Science Engineering | Dr. B.R. Ambedkar Institute of Technology, Sri Vijaya Puram Nov 2024 - Present
GPA: 8.33/10

Senior Secondary (PCM + Computer Science) | St. Mary's Senior Secondary School May 2022
91%

TECHNICAL SKILLS

- **Languages & Core:** Python, Java, SQL
- **Data Analysis & Visualization:** Pandas, NumPy, Exploratory Data Analysis (EDA), Statistical Modeling, Power BI, Tableau, Matplotlib, Seaborn
- **Engineering & Development:** Git, REST APIs, Streamlit, Workflow Automation, Code Quality Standards
- **Management & Operations:** Cross-Functional Leadership, Agile/Sprint Planning, OKR Execution, Stakeholder Management, Process Standardization
- **Documentation & Communication:** End-to-End Technical Documentation, Product Requirement Documents (PRDs), Client Requirement Translation, SOP Writing
- **Certifications (65+):** Google Advanced Data Analytics, Google Generative AI, Deloitte Data Analytics Simulation, Meta JavaScript Programming, Google Cybersecurity Professional - plus 2nd Place, Data Science League (All India)
